

6-Week Reflection #5

1. How have the last six weeks been for you in AP Physics? What's gone well? What has been challenging?

The last six weeks have gone fairly well for me in AP Physics. Overall, I'm happy with my grades and understanding of the concepts. I also found the last unit (Magnetism and Induction) to be my favorite this year. Circuits were very challenging for me to begin with, but once I gained an intuitive understanding it became fairly easy. I think I only struggled with them because of a few fundamental misunderstandings at the start.

2. What are you most looking forward to during Spring Break?

I look forward to a 4-day trip around the East Coast. I'm going to see colleges for a day or two and then I'm going to go to my parents' university, Niagara Falls, and other East Coast cities. If we can time it right, I will also see the total solar eclipse at Niagara Falls as it goes directly over.

3. What are your goals for the last ~7 weeks of the school year?

I'm pretty much done with all my last units and tests, so I plan to study for the finals and AP tests and then I'll be done with Junior Year!

4. Regarding AP exams...

- a. Do you plan on taking one or more of the AP Physics exams?

Yes, I plan to take the AP Physics 1 and 2 exams.

- b. If so, what is your plan for reviewing concepts (in addition to the practice tests on AP Classroom I've prepared)?

Mostly review the slides, and practice problems on MIT Workbook.

- c. What other AP exams, if any, will you be taking next month?

AP Chemistry, AP US History, AP Calculus BC

5. a) What is one question you'd like to ask your teacher?

What do you think is the superior science (Physics, Chemistry, Biology)?

b) What is one thing you'd like to tell your teacher?

Physics is the superior science.
